## **DETAILED ACTION**

### ***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Claim Objections***

2. Claim 1 is objected to because of the following informalities: on line 8, it appears that "Yong's" should be "Young's". Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1, the recitation that the high-elasticity base material has a "high" Poisson ratio and Young's modulus is indefinite because it is not known what values applicant would consider "high." Thus, the public would not be able to ascertain how high the ratio must be in order to infringe the claim. Also, for this reason, it is impossible at this time to make a comparison of these claims with the prior art. It would be impossible to ascertain whether a given prior art reference anticipated these claims.

### ***Response to Arguments***

5. Applicant's arguments with respect to claims 1-4 have been considered but are moot in view of the new ground(s) of rejection.
